Eunyoung Sung (esung@qti.qualcomm.com)

Keynote Speaker:

Dr. Eun-Suk Seo

The year 2013 marked the 80th anniversary of the discovery of the positron, i.e., the antiparticle of the electron. The discovery of the positron, and subsequent discoveries of other antiparticles, indicates that we are indeed embedded in such a world. Dr. Seo will summarize findings from direct searches for antiparticles in cosmic rays and related studies.

No Registration Fee

New members are welcome!

Bring your friends and colleagues!

Breakfast, lunch, and coffee will be provided!

Meet your friends, colleagues, and leaders!

*You can bring your children.
